

Paul Solomon Prophecy Readings

Paul Solomon Reading 9418 Japan, September 1, 1991

Public Reading

Q-1. You will have before you the Records and the enquiring minds of these people gathered here, the nation of Japan and the Records related to World Prophecy. You will give relationship to Universal Forces and comment on purposes and direction. Please allow for translation by stopping after each sentence. Please answer questions as I now ask.

A-1. Yes, we have these Records, and we would help you to see the world balance changing in this manner.

Be not so concerned with changes in the Soviet Union at this time, rather be aware of the alliance of the world of Islam, for this world is the fastest growing cohesive element.

And understand recent events in this manner, that much of what you have seen as may be scandal in economics has come as a result of the dominance of commerce and banking by western businessmen associated with Christianity and Judaism.

This is especially significant to the world of Islam who attempted in what you have called BCCI Scandal to assert itself as a new alignment of nations begins to form. It is because of this that we have warned in previous times of a Jihad or Holy War toward the end of this century. For there has in fact been an unfair manipulation of economy to exclude the Islamic world. Thus in the re-alignment of nations, Islam tends to see the attempt to isolate that sector.

We have given emphasis in this time to overcoming differences attributed to religion, and attempts to avert what you refer to as a Third World War, but it is virtually inevitable that these forces aligning in such a manner will create what appears to be a Holy War. The opportunity to avert such a holocaust comes in more appropriate alliances with those countries, the overcoming of fear and misunderstanding in the western world toward Islam.

As to the role of Japan, there is a difficulty here, as well, in economic alliances, for you will find that much of the world's resource and money is to be found in those countries that are largely excluded from banking and economics. There is a massive cartel of control by them which attempts to limit Japan's role in economics. Much of this you have already seen.

During this period of realignment of nations, it is important that you reach out not only to western nations, but will find a need for a balance, an awkward balance, perhaps, with the Islamic world as well.

If you then would play a meaningful role in assisting the development of those countries, to reduce the anger of isolation and prejudice, for you will find an Islamic leader emerging, and this will lead to that we have spoken of before, an attack on Israel, which will be a major threat of the use of nuclear arms. The recent war is a portion of the balance of which we speak, and will be re-encountered.

Do not underestimate the power of those who know how to pray and meditate to change the consciousness. Would offer prophecy as opportunity that you should change such outcomes.

Let us continue with the questions.

Q-2. Please describe the world disasters, earthquakes, eruptions, climate changes etc. that we can expect. Please comment on the prophecy that all or part of Japan will sink into the sea.

A-2. More natural disasters than man-made. However, man-made from environmental imbalances already are established, and it is unfortunate that nuclear forces are placed along unstable lines in this land, this country. We certainly do not see the disappearance of major portions of Japan before the next century. The prophecies which have been given earlier relating to the disappearance of these islands should be reconsidered. Understand that prophets of a more ancient time could not understand such phenomena as nuclear disaster, therefore in their visions and prophecies they tended to describe them as earthquakes.

There need be a program immediately in Japan of literally farming a particular bacteria which has been referred to as a sludge from the ocean which has a capacity for digesting radio active waste. The farming of these bacteria is essential to the protection of the world from the accumulation of radioactive material.

It is true that there is pressure building under the plates of Japan, but the recent activity you have seen has taken much pressure off the Tokyo area. As these pressures are relieved in other areas, a greater portion of the country is made more safe.

You should, however, challenge your Shinto priests to renew their understanding of the use of the large poles or logs as were used in an ancient time in the establishment of this science as would stabilize fault zones.

It is time to realize the similarity between the organism of the earth and that of the human body. And understand earth meridians in the same manner.

Q-3. Does the DNA change during a man's spiritual growth in the cycles of time?

A-3. Perhaps you use the wrong word, for the DNA strand does carry the genetic coding from lifetime to lifetime. The genetic coding printed in the DNA is quite literally the Akasha and the karmic record of the soul. Thus the chromosomes and genetic coding are a result of the pattern of living a life or karma. It is in that manner that the Akashic Record is made visible and karma is carried forward from one lifetime to another.

Let us speak of medicine first. In medicine, there is already sufficient information with experimental evidence to establish a new medical paradigm. There is sufficient evidence to establish that the embodiment of thought is that which makes the physical body vulnerable to agents which cause disease. A revolution in medicine will occur in such a manner as to teach a Science of Thought.

However, vested economic interests delay the establishment of such a paradigm for as much as ten or twenty years.

As to science, scientific initiates will soon establish methods of communicating free energy without the use of electrical lines. The formula will be discovered for fusion rather than fission in the release of energy so that energy may be accessed from its Source rather than through destructive forms, which must burn and destroy in order to release energy. Then you must see a time that spiritual awareness and physics come to a point of mutual understanding of the nature of matter.

That discovery is very close at hand. It is at first to be guarded by initiates until safety measures are established for releasing it to the wider scientific community.

Q-4. Please describe the meaning of the Age of Atlantis and the present civilization and also the new civilization which is to come. Why such a rise and fall of civilization? What is the role of Shamballah in the New Science?

A-4. Would do well to understand the nature of the sequence of worlds. As a point of reference, perhaps, consider the four worlds of the Hopi. As an age or a world becomes obsolete, the form in which the soul manifests or the physical body becomes obsolete with the age. This planet has gone through the worlds of Lemuria and Atlantis, and in those worlds, physical bodies differed dramatically from those we have today. So at the end of this Age or Eon, the earth will renew itself. After an ice age, a beginning of Eden again, and humans will incarnate in new form, forms more appropriate for the lessons of the age.

Are there further questions?

Q-5. There are no further questions.

A-5. Then our comment to you would be: Accept responsibility for that you create with your lives. This world has been a world ruled by fear. Fear is the destructive energy. A divided or bicameral mind can only create destruction. It is through the building of the unified mind that man may build a unified technology and learn to build energy rather than destroy matter for the release of energy.

If that principle is understood, you will know that love is greater than fear, that the force of life is more powerful than the force of death, and that man cannot ultimately destroy this planet, for this is a living being that is a body of God. That which is created cannot destroy its creator. Therefore you should then ever give hope, not give anxiety.

That is our message. It is meant to be encouragement and blessing and not to be taken as warning.

As we must be brief, we are through with this for now.
