

AWAKENING THE GOD SELF

Paul Solomon Reading 0241- LH - 0179- FA - PT, Greenville, South Carolina,
September 20, 1073

We would find that first appearance or that affecting this so closely and forming those purposes, as a teacher and instructor, coming from Alta or traveling from that plane in the breaking up here, to the temples, then of Egypt, as these were set up. This one an instructor in the Temple Beautiful.

Now, if you would understand those manners of the giving of instruction in this way, not that this one was an instructor of those being treated or being transformed, as was the practice and the purposes here by the exposure to the arts, but rather this one of those setting about the programs and teaching those of the workers in this temple.

Now, if you would find in this manner, there were the artisans, the musicians, those using that of the human culture or the higher levels, for the awakening of the consciousness of these not yet formed, or not realizing self to be of God or of human. Yet through the exposure to the color, to the light, to the art, to the music, and those that are the expressions of God in this plane, so that nature of God was awakened in this Temple.

Now this one was not of the artisans, the musicians, but rather the instructor of these, or explained those manners in which this application was made and the purpose. Then set about the programs that would be for the lifting of these consciousnesses or this one would schedule the events you see, would hear, prescribe that this one be exposed to music of this type and in this range in this day.

Then to those certain colors, each color producing, then its characteristic reaction within that body or stimulating those glands or slowing this one and that one, that the bodies might be the more perfectly formed. Might be called as well a messenger between those Temples of Sacrifice and the Temple Beautiful, for these done in conjunction with the surgery, the medical treatment, in this time for the removal of the appendages or the reformation of the bodies in the more perfect shape. And was the purpose.

Now we examine this particular lifetime, in relation to this one, for this reason. This one has returned in this time with an awareness of the need for awakening the awareness of God, or the reality of self, or the God-self, or that that is highest within the self. This one would seek in this time to awaken that that would be the challenge to the self, cause these, then, to come awake out of the sleep, that they might realize themselves as the Master has said to be gods; and is the purpose in this time, that more be reached.
