

UFOs

Paul Solomon Reading 9590.

Q 1: Please tell me about my relationship with my mother and my sister. My mother and sister are psychic and have had many mystic experiences.

A 1: We must look beyond your words to understand your question. We will approach it in this manner. The three of you were, in a rather ancient time in Greece, you were trained as oracles. The one who is in this time your mother was referred to in that time as Pythoness. There were many lessons in that lifetime, for you learned much in the experience in leaving your body and traveling without the body. You learned much about going deeply into trance states and being guided through various planes of existence. You were given questions to answer and such.

These were portions of the training. You also, however, toward the ending of that period when the enlightened one had passed on from that area, the school began in some ways to decay and you were then used by some priests who were not always acting with your own best interests in mind. And for that reason, there developed within yourself, within the soul to some extent, perhaps a smaller extent now because there has been some healing, but for a time there was a great fear within you of psychic or mystical experiences.

Now in the period in this land in this country [Japan] there was the introduction of a mystical form of Buddhism that had not before been known. Now the priest who established this sect of Buddhism was himself a mystic and he was quite an orator, a preacher as it were. And even evangelist in the sense that he went here and there about the islands, and with his charisma he brought many, many people into this form or sect of Buddhism. And under his guidance and action, for the first time, there was introduced into Buddhism the teaching that one may communicate with the cosmos, the great cosmic Spirit, or the cosmos itself, which in his teaching was considered a form of the Buddha. Or perhaps it might more clearly be said that as he taught of Buddhism, he taught that Buddha had become one with the cosmos, and he encouraged that people begin within themselves to relate to the greatness of the cosmos and ask questions and learn to listen for and receive answers.

This sect of Buddhism was the influence on the three of you in that time, and your relationships had changed, for the one who is your mother in this time, was in that time the youngest of the sisters. And yet you were again together. Now we should explain here that in Greece you were not related as mothers and daughters. She was a teacher, the Pythoness. And the two of you [your sister and yourself] were neophytes training as oracles.

In the returning time, then, you came as a family unit. Now that sect of Buddhism renewed in all three of you the ability, the soul memory that it is possible ask questions of any nature of any purpose as long as there be a purpose for a question. A purpose greater than simple curiosity.

You could ask of the cosmos and receive a response. Now these experiences had prepared you for what you are experiencing now in this lifetime as the three of you are together as a family. Each of you from past

lives has brought into this lifetime a great deal of sensitivity. You can often see, as it is termed, you can see through the veil, or see beyond the veil.

And it is this that is occurring when you see what is referred to in your questions as UFO's. We would instead suggest that you discard that expression UFO, for they are no longer Unidentified Flying Objects! They are, in fact, inter-dimensional craft. Now rather than being flying objects which fly great distances from earth to other planets or the sun or beyond to the Pleiades, or through out the cosmos, these lights as we will call them for the moment, are inter-dimensional craft which when one is truly prepared would mean a restructuring literally of your physical body

It is no small matter. But in situations where you are prepared, you could enter such a ship or vessel, inter-dimensional craft. And we would like you to understand, it is difficult in explaining that time and space are very closely related in the sense that time is an idea, a paradigm put forth by man to refer to moving physically from one point to a distant point. And man has built his sciences upon the belief that the distances between heavenly objects, the planet, the sun and other spheres, have great distances between them. And to move from one to another, it is necessary to take the time that such scientists believe as the absolute, the time that it would require for light to travel from that distance to this place, so that if you were in a craft which could move even at the speed of light, it would take lifetime after lifetime after lifetime to move from one galaxy to another in such primitive craft.

Inter-dimensional craft, however, are not involved with time and space. These are measurements, these are fictions of man's ability to make sense of his world, his reality. Time does not, in fact, exist, nor is space relevant. If you entered such a craft and change dimension, it is not necessary to travel to bring an ending moment, when you would stop being here and start being there, without having traveled the distance between.

There is no distance or time. Inter-dimensional craft arrive at the same time that they depart, and only when they are allowed to be revealed to certain individuals are they even seen, for in their mode of travel they do not fly as such, even at great speeds, it is not a matter of flight. They can fly through this atmosphere that we think of as space and time, they are capable. And yet as they wish to move then from this galaxy, this earth or solar system, to another they do not fly in such instances. They simply cease existence here and begin existence there simultaneously.

Now that explanation may be insufficient, and may sound quite foreign or science fiction or such to many. There is a sense here that you will to some extent at least understand what we speak of. We also wish to speak to you in this manner of a word of warning. It is not our purpose to create fear, for fear is dangerous. At the same time we would have you know that there are ships or craft that are not for purposes of human beings, are not in the best interest of human beings to interact with. They are the less developed and they are even known to, for lack of a better word, "kidnap" individuals, take them aboard and examine the body, particularly attempt to understand the reproductive system, and then attempt to erase the memory of the person and return them.

Now these are not good and healthy experiences. These we would avoid. And if you would avoid them take for yourself some such shield as is worn here, which has engraved upon it the ancient archetypes of

protection. It is activated by a force field which you yourself build around it or permeate it each day, and protects then the body, mind and spirit from contact with any craft not of the best intention.

Now we should think that is about as much as we will say of the UFO experience for the moment. We will just remind you that this a matter that often you see through the veil, and what you see are lights, you see beings who are also close to the veil who are attempting to see into this dimension.

Q 2: Please comment on my dream that I had on October 30th, 1990. I heard a voice from heaven saying, "Reflect deeply about yourself and try to establish Utopia on this Earth. She had seen a catastrophe about this earth. And then the voice said, From today record all your dreams in your dream journal." Please relate this dream and its meaning, and also relate it to my mission and purpose in this life.

A 2: The dream is of a catastrophic event on earth. The warning voice spoke of creating Utopia. We have the dream and the purpose and the reference.

What you have here now is the fact that about the earth, here and there in many, many more places than you might be inclined to think there are individuals who are opening to this great cosmos that we have spoken of in this mystic form of Buddhism. But we are not limiting this to one religion or one faith. We are saying rather that the cosmos spoke and said, "Reflect upon yourself deeply, upon your life and its purpose. What will you accomplish by having been here." And it spoke of the possibility of Utopia, which many have discredited as an impossibility, but spoke of the responsibility to create a utopian existence.

Now this is a message that has been delivered by dream, vision, and other means to many about the globe, which essentially is communicating this: there must be created within a few individuals a healing of the very nature and structure itself of the brain. The brain as it is now is cleft into two hemispheres that only communicate with one another at the base. And this base portion of the connection between these two brains is an antagonistic experience, an argument and that which is referred to as self-talk.

You think by talking to yourself between these hemispheres. There are those who are of mystic nature, and who hold the very highest ideals of perfection for mankind. These individuals are called to come together for the purpose of building a cover over the top of these two brain hemispheres, making a bridge over that great gulf, fixed as it is referred in Bible terms, between these two brains within the human head.

When there is built the bridge over these two hemispheres, it is a flash of light from pole to pole. The flash of light becomes a crown of light. And the brain becomes unified by the crown of light, which rests upon the crown of the head, which may even be seen by some, not by others. This crown of light is the crown of enlightenment. Now only a human with such a perfected brain structure can understand the existence of a Utopia. Only such a being with the mended brain, the brain which is once again synchronized, and transformed, even transcended, will allow that individuals, scientists may create an energy that is non-destructive to earth, a free energy that we may use the living energy about us even in this moment, to convert it into the nature of what is needed.

Now to such an individual who has created, experienced, and wears the crown of light, there are no impossibilities. This is the establishment of eternal beings upon what will be called a new heaven and a new earth.

Now it often seems strange to those who consider themselves wise, it seems strange that the great cosmos would speak in dream terms and metaphors and enlightening communications with young and innocent and not highly trained individuals. And the question becomes why? Why would the great cosmos choose one such as I for the purpose of joining those who would create a Utopia? And the answer is that only those who have a mind that is still very much like a child can accept, can perceive, can imagine, can visualize, even understand, believe in such a possibility. And for this reason it was said by the Master of Masters, "Unless you can become of mind like a little child you cannot enter the kingdom that is utopia."

Children do not consider impossibilities. Children believe they can do all things, have all things and be all things. They think without limitation. And so such ones are chosen to receive such information and inspiration, stimulation, which often must be then translated, explained and taught to move to the levels where such may be put into action.

Still that which was told you in the dream was a statement of life purpose. It is the purpose of your life to stop the destruction of the earth and build instead a utopian existence, a new heaven and a new earth. This is given as life purpose. And a part of accomplishing it is the child [your son]. The child will lead you. Understand that and you may understand all the rest.

Q 3: Please let me know about my guiding spirit and protecting spirit.

A 3: Well, yes, we will prefer to do it in this way. Already within may we say imprecisely, within or about the crown of your head there is the existence already at this moment of a Divine Being which could be called God. It is a Being higher than the angels, more than great spirits. It is the nature of the Source of all creation. This is the highest Self, your Higher Self, your Source, Creator. This already exists as if it were a crown upon your head.

Now this presence, the Intrinsic Self, the Intrinsic You, this is a non-assertive Being which simply acts in your life for most of the time simply as an observer watching that you do, making no judgments of right or wrong. [It] simply allows you to learn to move physical matter and to move beyond matter into new movements. However, this non-assertive being that is the intrinsic Self, the Higher Self, may be called into assertiveness simply by asking. This is the function of what the religionists have called prayer. But forget prayer in formal terms. Simply call forth communication with and help from and friendship with this intrinsic Higher Self that is within you, that is the crown of your being.

Now in addition you also have what is known as a guardian angel. The nature of this being is that of protecting the entire sphere of your life, not just your physical body, but even the influences which can come within the area of your awareness. This guardian angel spirit will not allow any accident, any evil, any destructiveness, any threat to you, to enter your sphere of existence, even in imagination, unless the entry of that danger or accident or such unless it serves a purpose which makes of you through the experience a better and greater and higher being.

Thus you are totally protected from anything that could result ultimately in harm. Your guardian angel will never allow one to come into your life unless you have need to know that one. We could even say in this moment that the four of you who are in this room could not have met one another without the agreement of the guardian angels of each of you. These angels have decided that you have need to know of one another and thus have allowed you to be drawn together from completely across the globe that is the earth. The guardian angel has that great a sphere of influence upon you and is there to be called upon and will respond.

Now we believe that is the response that is required to what you have brought before us from these records and the witnesses are being dismissed.

We now close the records for this time.
