

## "The Fall"

### An Alternative Approach

Paul Solomon Reading 9543 - L - MA - DJD - Osaka, Japan 5/4/92

**Q1:** *Please describe the highlights of my past lives.....*

**A1:** Yes, we have the cosmic records of this soul before us. We find the journey of the soul as beginning with a self-consciousness upon a sphere, or planet as it were, which no longer exists within this system. It continued to exist until there was an expression of separation, a movement beyond androgyny on this particular planet, so that this planet became one of duality or of cause/effect, one of light and darkness which did not exist in that previous experience which could be referred to, perhaps, as Vulcan.

Then, from the outermost reaches of this system, as it exists now, the soul record, the great record of the soul was begun in that time and we will give only a brief comment about the nature of such a book or a record. You will find descriptions concerning this in the Book of the Revelation as written by the Apostle John, or John of Peniel, for he spoke of a Book of Life and also spoke of the Books of Wisdom, seven of which are contained within the body akasha of any entity of self-consciousness within this system.

He also spoke of a Book of Life which contains the soul name or soul marking of all those who have entered through this system at any time and, in addition to those Books of Life concerning each soul for sojourns on each different sphere or school of this solar system.

For that reason, as we find our approach to these records, we are faced quite literally with eight great books of Life Records or Akasha for this soul, quite an amount, as you might gather, quite an enormous volume of information about the experiences of this soul.

Now, we will speak only of those which are highlights of development. We will also advise you that, upon entering into the Temple of Temples, the Holy of Holies within yourself, within the crowning Temple that is the Temple of the crown charkas or wheel, there you will find a Hall of Records which contain all these books. The Books of Wisdom are, however, opened one at a time by angels guarding each of the books so that the information is protected and is known only when the soul is prepared for encountering the experiences, for using them for accomplishing the initiation concerning that particular record and attaining that wisdom and moving on to higher levels of initiation.

Now, with that preface, we will move on then to say the soul has lived in experience on all of the known schools of this solar system and, as we say all the known schools, we refer to those known to you within your system. Many references could be made to

lessons learned here. We will concentrate in particular upon that of Jupiter and of Venus which are relatively recent times of experience.

Jupiter is a school of expansive creation. It is, in many ways, the school of unconditional love within this solar system, though we realize, of course, that Venus is often referred to as the sphere of love, it has a different meaning. Jupiter is that school which causes the expansion of consciousness. And in your experience or sojourn upon that planet, there is a seed planted in you which causes a desire for wisdom, for consciousness, for initiation, for knowing all that can be known, for knowing all things. For, like the consciousness of man, Jupiter is a sphere of expression of expansion, of generosity, of giving to others, of selflessness. And (it is) a school of power as well, but an unselfish power that is not used against others, nor is there even a thought in lifetimes in that sphere of a difference between one being and another so that self-identity, self-consciousness is not at all important on that experience.

From that to the movement to Venus, we find the developing in this soul of, what we will refer to as, the fires of passion which are often turned toward love (and) also too often misuse in the over-expression of the passions (and) thus, must be balanced in the experience in Earth, which is the school in this system of cause/effect relationships. It is this school that is the school of creation and, upon this planet, this dualistic planet which, at any given moment, experiences light on one side and darkness on the other, as an illusion, of course, for darkness is not something which exists, but only refers to a relative absence of light. However, this illusion of duality becomes rooted in the consciousness of mankind and becomes the ultimate challenge of initiation to be overcome.

Now, it is overcome when the energies, the powers, the emotions, the appetites, all that any individual may claim control of, which includes, of course, all facets of body, mind and spirit, even including those referred to as sub-conscious and those thought of as autonomic nerve impulses and such, the consciousness necessary to maintain any and all of these is available. It is, however the experience of entering into Earth, as you came to this sphere in what has been described as chariots of fire; perhaps you would refer to them as ships, though these chariots of fire which are very much like a meteor perhaps, as a vehicle, brought the many who entered into and began to build the age or the day of Atlantis. And in that time, in the early periods of this development, the souls inhabiting at this sphere were quite busy in exercising co-creation with that Source as apprentice gods, if you will, learning to use the power of creation.

Now, as only when one was tempted to understand better the relationship between light and darkness, or a relationship that was hardly discernable at that time, between one individual and another and even each individual being androgynous so there was no male or female and yet the driving force, the highest power of consciousness in each individual soul at that time, the greatest hunger was for knowledge, consciousness, understanding, wisdom. And, this in itself is, of course, good and useful. Each soul was aware of the ability to create and for as long as that awareness was maintained, there was never a thought of competition. Because, for as long as life-forms on this planet

were creative, there could not be a thought that, if one should take more, that another would in turn have less.

Thus, there was no thought of competition but there was curiosity, a curiosity of understanding the relationship between life and darkness and what is called love and fear or good and evil. And, though those inhabiting this school were warned against inquiring into such knowledge, the compulsion to know was too great for many to resist, and so there was the reaching into self, what is referred to as eating of the Tree of Knowledge, good and evil. (It) was actually a partaking of self or selfishness and the separation within self of the two sides, the two hemispheres, the two energies which, as you would see represented in the Tao in this time as yin and yang, are perfectly balanced; there are not two in actuality but only one.

Still the experiment with the curious souls was toward the separation of this yin and yang, which made one, which in turn allowed the separation of the masculine and feminine, the impregnation of the one and the other, but which resulted in the parting of the brain itself, the two hemispheres of the brain, or the cleft brain, as we would refer to it.

This was the beginning of all thought of competition of recognition of darkness; it was the birth of fear; it was the beginning of all things that a soul must graduate in consciousness in this time, which is the purpose for the establishment of a Mystery School: providing techniques, encouragement, assistance in releasing the appearance of duality, and allowing the individual to experience only light without darkness as a point of reference, the ability to experience light without needing dark to make a point of comparison. And so it is with love and fear, with good and evil, with all things you think of as separation and duality. It is the purpose of the Wisdom School, then, to bring back together that which has been separated in consciousness and to create wholeness.

In an expression of wholeness on this planet, there cannot be, in any way, there cannot be any form of disease, there cannot be any form of harm one toward another, of war, or of crime, or of what you think of as life and death. Nor is there a separation in consciousness between one side of the brain and the other, nor is there a separation of the consciousness of mankind with the consciousness of God.

This, then, is the return, the second coming, the coming to Earth of God-consciousness and it is an experience which is available, even in this time, in this day. But (it) may occur only when there are a sufficient number of individuals so absolutely and totally committed to losing this illusion of separation and committed to emptying both mind and body of all experiences of fear of any nature. Which, of course, necessitates an absolute and total relaxation, so that these embodied thoughts of separation and good and ill, sickness and health and such, these thoughts which become embodied and are as knots or crystals in the body, these are broken down and passed away from the body in, perhaps, such an application as we have described and created as the PRE table, using appropriate music for the breaking down of separation in con-sciousness, so that, with appropriate rhythms on this instrument, when it is treated as a holy instrument, the

appropriate sounds, harmonies, rhythms will cause the hemispheres of the brain to function together.

And when there is, simultaneously, the commitment to empty the mind of thoughts of separation, competition, fear and such, when the life force which maintains you is no longer drained away by the negative emotions or experiences, thoughts, there is the powerful force, the all-powerful force that has been called the Rod of Jesse, it has been called the Staff of Moses, Erin's rod that buds and so on. This light, this Shekina, as it comes joins the consciousness of the soul of mankind in a stream of light, in some ways similar to what you speak of as a laser of light: this is connection between the self and the consciousness of the Source or Christ-consciousness. As this occurs, enlightenment or Christ-consciousness comes into the expression of life in this time.

Now, we are responding with such a description because of your combination of questions relating to your experiences in many different spheres of solar system and of your request, in particular, to find the opportunity to graduate this system and exit through that gateway or doorway which is the sun itself, that you may go on to other schools, other work, other experience and growth. And it is well that you should so desire to grow beyond duality and selfishness.

You have questions concerning the times of your appearance in Atlantis and we have mentioned the earliest time when you arrived there by a ship of fire, or that which we would call an inter-dimensional craft, not so much a space-craft as would travel through time and space, but inter-dimensional so that one arrives even at a distant, very distant destination, at precisely the time that one should leave from the point of origin with no lapse of time.

In such a manner you entered into this sphere (and) understood much of the law of one which ruled at that time without separation and such. You also saw the deterioration of the race as duality was discovered in what is called the Fall, and the use of the great crystal which gathered, concentrated, magnified forces of light and universal force and then was able to focus it in many different ways to provide for travel along the beam of focus, allowing, of course, travel at or beyond the speed of light. It also allowed to produce a pathway of focus through matter, through the Earth so that one could travel in such a way through matter, for time and space were not considerations.

However, the instrument was finally attuned in such a way as to reveal the separation of light and darkness and the beginning of the understanding of separation came into the consciousness of man. This was the time of the Fall, of competition, of all that we see now and use as points of reference for good and evil, right and wrong, life and death and such. When there was, then, the collapse of that community, that life, that temple that was Atlantis. You were among those that went out to assist in repairing the work and, upon entering the area which you now call Egypt, you realized then what had occurred to the native species of this planet, for you were, even in that time, still would have been considered a species of Venus, whereas those of Earth needed to be awakened to self and to God-consciousness.

For that purpose, you and others created three schools or temples as were called the Temple of Sacrifice, the Temple Beautiful and the Temple of Initiation, a purpose of these schools being to awaken a species without self-consciousness and certainly with no concept of a Source or Creator or God, without an awareness of love and such. You set about in the creation of these temples to expose these creatures, or beasts as you might see them now, you exposed them to beauty in forms of music, of light, of rhythm, dance and such, and when these beings would respond to such an expression of beauty, when the consciousness, in turn, in the activity of making sound and music and beauty, rhythm and dance, then, you, who were of a priest-like status, would explain to that being, although there was not language, the understanding that the beauty that they experienced was a manifestation of God in them and through them; that God had entered into them and was producing beauty, rhythm, emotional response and such through them.

They were taken, as well, by others of the priest-like group from Atlantis and were brought into a temple in which their bodies, which would seem so strange and primitive to us in this time, to you in this time, these bodies were manipulated in quite a number of ways. This was the origin, for example, of yoga, of Pranayama, of martial arts, of all forms of exercise and medicine and surgery even. Also introduced in this Temple of Sacrifice (was) one which you might find quite strange; (it) was here that the death of the physical or human species first occurred and it was accomplished quite deliberately, for the priest-like Manu of Atlantis, of which you were one, you helped these beings to literally die to the physical bodies they lived in and they, too, with your assistance, to build a new body, more perfect, more effective and so on.

And, so it was that the cycles of life and death on this planet and the graduation, initiation cycles of what you call incarnation, were established by that temple in that time. Then, in the training of the mind, the mind of these lesser beings were still single but with, what you call, an instinctual or reptilian brain.

And, it was in the Temple of Initiation that the Manu, or the priest-like elder brethren from Atlantis and from other spheres, both within and beyond this star system, there worked to create a brain which could acknowledge itself by separating that brain into two halves which would have an ability, then, to communicate with one another, even to argue with one another and have a conversation within the mind and so created quite a new method of thinking which also produced reproduction in combination with the Temple of Sacrifice.

This, then, is the pathway of life itself and your pathway through these times of existence. You did return to the land called Egypt in the Dynastic periods, for what we have spoken about here is pre-dynastic Egypt, even pre-historic Egypt. You had returned and had assisted in some ways in the development of instruments and a very sophisticated technology quite beyond currently existing technology, for it was the remnant of the technology of the singular mind. But because the brain now operated in two halves and largely against itself, there was a warp inside each person as continues to this day until one attains the Crown of Enlightenment, at which time there is

experienced then peace and no conflict, no inner war, for as long as mankind maintains war inside , within self, war and crime will exist and what you think of as disasters and such will exist.

And such as earthquakes, volcanoes, these things, these are not natural expressions of the earth; they are, rather a means of Earth ridding itself periodically of the accumulation of overwhelmingly negative and selfish energies and even such expressions of anger as the current rioting in California is only another form of earthquake occurring in this time for the nature of man.

What we call for, then, in your life and in the lives of those who are ready and prepared to awaken, we ask that you call together all those, those of separate groups, those who can hardly avoid some feelings of competition with one another, although we must overcome it, all groups who seek to know only love and not fear, never fear. As we can gather even a few who will come for training in overcoming the thought, the experience, the expression of fear, and be filled with the power of love, of oneness, of wholeness, if we can call these together from around the globe, even a small group, even a small unit of such individuals, we do have the technology, the understanding , the teaching, the methods for reuniting these cleft brains by bringing a Crown of Enlightenment which will once more build bridges across this great gulf that is fixed, as we quote there from the Bible's description of this.

Such may be healed and it is our intention, our selection of this one, the channel through whom we speak, not that this one would be a ruler of any sort, but is rather one who has the ability to recognize and to call together those who do have the light, the love, the commitment, the preparedness, the selflessness, the devotion to study. We have a seed here of a Planetary Mystery School in this time, we have selected quite deliberately that there would be a foundation laid by bringing people from very nearly opposite sides of this world, of the Japanese with the Americans, to inaugurate this school. But the time is so short, so brief before we must gather and prepare these materials and opportunities.

It is, then, the highest order of priority that there be even sufficient funding, though it may be small, to publish the intent, to appeal to those who have much greater sums and might be able to understand the critical importance of such a school, that we might gather the millions of dollars that it will take to express this school in its perfection, not only in America but also founding part of the family here and in several places both in Japan in America and in many, many countries of the world until each group of twelve individuals who have attained this singleness of mind, each group of twelve will raise the consciousness of the entire planet, of the entire race, one initiation higher and closer to the experience of a new Heaven and the new Earth.

It is of critical importance, because of the rate at which life is being jeopardized on this planet. Although man cannot exterminate life, he can, however, exterminate the human race and can render this sphere, this earth, this planet uninhabitable by the race such as the current human race for many thousands of years, an ice age or more.

We seek that action may be taken before that time by having you and all those who are prepared to commit the self, not only to learning through words, (for) this is not what changes the consciousness of mankind, but by putting before you experiences in which you must make decisions and develop character and eliminate competition within your consciousness, learn love in wholeness and establish it so that the many may be drawn to new and higher levels of consciousness on the planet.

We are aware that we have left little time for remaining questions. Do there appear to be those of particular importance?

**Q2:** I am now involved in the project called "Aquarius Preparatory Committee". The purpose of this project is to raise the global consciousness of the Earth to Cosmic Consciousness. Please give me advice on working with this project. Also give me advice about preparing for the descent of Christ Consciousness in Earth.

**A2:** Yes, we can speak of work with such groups. There are many thousands of points of light about the planet which, as joined together, do create what we speak of as a global or planetary Mystery School.

The greater challenge is to break down the walls between them, the illusion of competition between them and bring them together. Thus, in the groups you will serve with, serve always as a networker and a bridge-builder from group to group and become one of the initiates, which as of the oldest of the ages is referred to as a Temple Builder. For, it is said, rightly so, that the Mystery School, the Temple of Initiation, is always built by the hands of the student.

Thus, prepare yourself in every way you can to network, to inform groups one of the other, to create a consciousness as broadly as possible in this land that there is a time and an opportunity now for building a school of global family, global co-operation, planetary kinship, kindred spirits about the planet and the end of fearing one another, the end of ethnic strife and racial divisions until we know that we are brothers and sisters one with another. And not only with one another as human beings but also with those blessed and very sacred beings who once existed with arms, legs and such as you, who were able to use instruments of war and through their higher evolution became mammals as you know them of the sea; the great whales, the dolphins, the porpoises, these are innocent but profoundly wise, exceptionally loving brothers and sisters of human kind on Earth. And not only those, there are other species, and the lowest of which you might consider and yet one of the highest in contribution, is the very lowly thought- of figure of the earthworm, which is the only creature on Earth which leaves more than it takes from the Earth. Consider that.

And, then you have these beings and the Angels working with you to lift the consciousness to a new and higher experience. Do so, do it with all your heart, all your strength, all your might, withholding nothing, but establishing a new Heaven and a new Earth.

That is sufficient we believe in the reading of these records. We are through for now.
